About

Weather Vortex is a project that aims to provide the user a unique service to check all the weather forecasts and paragonate them.

Starting from this need, this platform was created. Here it's possible to simplify everyday decisions that are weather-based-

This can lead to a huge amount of time saved and to a better organization

On the other hand, the user can also customize his experience adding Iot device to "trust" and leave feedbacks to all the services available.
