# About

Weather Vortex is a project that aims to provide the user a unique service to check all the weather forecasts and paragonate them.
Starting from this need, this platform was created. Here it's possible to semplify everyday decisions that are weather-based-
This can lead to a huge amount of time saved and to a better organization
On the other hand, the user can also customize his experience adding Iot device to "trust" and leave feedbacks to all the services available.
